PREAMBLE

Instruction For Use of Documentation

The total required information provided to design and build a StudioRes by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, and back of house and building site + exterior. **UNKNOWN** is the decor package for the Public Space and Guestrooms.

Comprehensive Criteria Documents for StudioRes by Marriott are:

1. Design Standards
2. Design Guideline Drawings
3. Heart of House Guideline
4. Specifications as indicated below:
 - A. **Building Product Manual (BPM)**
 - Volume 1 - Building Site + Exterior
 - Volume 2 - Public Space
 - Volume 3 - Guestrooms
 - Volume 4 - Guest Laundry Equipment**
 - B. Exterior Signage Specifications
 - C. Interior Signage Specifications
 - D. Interior Design Specification Manual

Alternate Sources of Information:

1. Change Bulletins
2. Additional Tools

Description Follows:

1. Design Standards provide a written macro view of the overall requirements for a StudioRes by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design Standards.
3. The Interior Décor Spec Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) includes the "guest-facing" building products (typically installed and supplied by the General Contractor) and all finishes required for the interior and exterior of the building. Marriott requires that all building products and finishes be provided by acceptable manufacturers. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for a StudioRes by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial StudioRes design. All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any StudioRes by Marriott project.

Use of Drawings

Building Product Manual (BPM) mark numbers and Interior Décor Specification Manual x-ref numbers are shown on the Design Guideline Drawings as a base number only. Refer to the BPM and Interior Decor Specification Manual for mark numbers and x-ref numbers plus a suffix for product and FFE alternates and additional acceptable manufacturers.

* In the BPM acceptable manufacturers of same material/product are indicated by a suffix of "XX", the abbreviation of the manufacturer's name. (i.e. PL-101-MO for MOEN or PL-101-KO for Kohler). If there are multiple manufacturers, and the item looks very similar, and its only difference is a matter of style, then it is considered a variation of manufacturer and not an alternate and would receive the mfr. suffix.

* In the BPM alternate materials/products/designs are indicated by a suffix of "A1", "A2", "A3", etc. indicating "alternate", following the base number (i.e. PL-101-A1). When only one manufacturer is listed, no manufacturer initials are indicated before the alternate suffix.

General Compliance Requirements

The Owner's/ Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

GENERAL NOTES

1. All images, photographs, renderings of specified items contained in this specification package area for general design intent and reference only.
2. Refer to the preamble for terms, conditions, abbreviations, definitions, responsibilities, and general guidelines for all specified items.
3. Refer to drawings for exact locations and/or mounting heights of furniture, fixtures, and equipment. In the event of a discrepancy between drawings and specifications, please contact Marriott International immediately for written clarification.
4. Submittal of shop drawings & finish samples to Marriott International for review and written approval is required for any item supplied by a vendor other than the specified source.
5. Design Documentation firm to verify that all flammability requirements are met for property location. The requirements noted within this specification are general and local flammability may be more stringent.
6. Install all products and finishes per manufacturer's recommendations.
7. Final quantity of items to be based on final plans, room quantity, and final matrix.

Plumbing Fixture and Residential Appliances - General Notes

1. All plumbing fixtures and residential appliances to be of contract quality and suitable for commercial use.
2. Site measurements required.

ABBREVIATIONS

General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor
ASTM	American Society of Testing Materials
AWI	American Woodworking Institute
CEF	Corridors, Elevators, and Foyers
CF/CI	Contractor Furnished/ Contractor Installed
COM	Customer's Own Material
GC	General Contractor
GR	Guest Room
GRB	Guest Room Bath
LY	Lineal Yard
MF/MI	Manufacturer Furnished/ Manufacturer Installed
N/A	Not Applicable

NFPA	National Fire Protection Association
NY	Narrow Yards
OF/CI	Owner Furnished/ Contractor Installed
OF/MI	Owner Furnished/ Manufacturer Installed
OF/OI	Owner Furnished/ Owner Installed
RFP	Request for Proposal
SF	Square Feet
SY	Square Yard
UL	Underwriters Laboratory

A. Toilet Accessory Abbreviations:

For your use in utilizing the Toilet Accessories within the Building Product Manuals, the following information is supplied:

1. The Assembly is the type of restroom or bathroom. The Assembly is not recognized by a number.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'TA' for Toilet Accessory Commodity. The first character of the 3 character suffix categorizes each toilet accessory commodity component, then is numbered sequentially."

- 100 – Grab Bars
- 200 – Toilet Tissue / Facial Tissue
- 300 – Glass Shelf / Iron Board Caddy
- 400 – Towel Bar / Towel Ring / Robe Hook
- 500 – Soap Dish / Shampoo Dispenser / Shower Accessory Ledge / Shower Foot Rest
- 600 – Shower Curtain Rod / Glass Shower (components)
- 700 – Shower Seat / Tub Seat
- 800 – Public Restroom (Feminine Napkin Dispenser / Paper Towel Dispenser / Receptacle / Soap Dispenser / Seat Cover)
- 900 – Miscellaneous

B. Plumbing Fixture Abbreviations:

For your use in utilizing the Plumbing Fixtures within the Building Product Manuals, the following information is supplied:

The Assembly No. contains 3 characters or prefix to define the type of assembly. The 2 character suffix is numerically sequential. Example TUB-01.

- TUB - Tub
- WHL - Whirlpool
- SHR - Shower
- SNK - Sink
- SVS - Service Sink
- WCL - Water Closet
- URN - Urinal
- WCR - Water Cooler" "EWS - Eye Wash
- MOP - Mop Sink
- CLO - Cleanout
- FLD - Floor Drain
- FSK - Floor Sink
- LIT - Lint Interceptor
- HYD - Hydrant
- RDR - Roof Drain

Mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'PL' for Plumbing Commodity.

The first character of the 3 character suffix categorizes each plumbing commodity component, then is numbered sequentially. Example PL-101, PL-102, etc.

- 100 – Sinks & Mop Sinks
- 200 – Faucets
- 300 – Toilets / Urinal / Water Cooler
- 400 – Shower Heads
- 500 – Shower Diverters
- 600 – Shower Surrounds / Shower Pans / Base / Tub
- 700 – Shower Doors
- 800 – Fittings
- 900 – Miscellaneous (Floor Drains, Clean Outs)

C. Door Hardware Abbreviations:

For your use in utilizing the Door Hardware within the Building Product Manuals, the following information is supplied:

The Assembly No. or Door Hardware Type No. contains 1 character or prefix "T". The 2 character suffix is numerically sequential. Example T-01.

Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'DH' for Door Hardware Commodity. The 3 character suffix is numbered sequentially. Example DH-001, DH-002, etc.

BPM (Building Product Manual) Number Nomenclature

(items are numbered with the item prefix and then consecutive numbers starting with 001 - "Mark Number" unless indicated otherwise)

It is your responsibility to familiarize yourself with the contents of the Design Guidelines and to keep yourself apprised of any and all updates to it on <https://lobo.marriott.com>

In the event of any inconsistency or conflict between a provision in these Design Guidelines and any federal, provincial, state or local statute, regulation, order or other law, such law will supersede the conflicting or inconsistent provision(s) of these Design Guidelines in all properties subject to that law. All owners/developers should seek independent legal counsel for advice concerning application of and compliance with any applicable law.

ALJ - Strip Light / Tape Light

STRIP LIGHT / TAPE LIGHT

2' LED Strip Lensed

Manufacturer: Cooper/Metalux
Style/Series: 2SLSTP2035DD-UNV

Attributes

2' LED Strip Lensed

Type: Strip

DIMENSIONS

Width: 2-7/16"
Length: 23-7/8"
Height: 42407

MISCELLANEOUS

Lead Time: In stock or 4 weeks
Warranty: Five year warranty

CUSTOM FIELDS

Reflector: None
Lamp Quantity: NA
Mount: Surface
Lamp Model #: NA
Finish: White
Trim: White
Lamp Configuration: NA
Delivered Lumens (LED) or Mean Lumens (Non-LED): 2498
On Dimming System: No
Voltage: UNV 120-277
Fixture Input (Max. Watts): 23
Dimming Type: 0 - 10V
Lamp Type: Integrated LED
Lens/Shade: Full Frosted Lens
Lamp CRI: 80
Lamp Kelvin: 3500K

Notes

Efficacy: 109
Lamp Life/Fixture Life: 50000

Metalux AP Series

DESCRIPTION

The SLSTP is a low profile, high quality luminaire offering the latest solid state lighting and electronic driver technology that optimizes performance and energy efficiency. With the SLSTP's low profile design, this series is an ideal solution for restricted spaces and meets traditional requirements for single or continuous row applications.

The SLSTP is an excellent solution for commercial, industrial, retail or residential applications. Ideal for new construction or simple fluorescent retrofit replacement.

Catalog #	2SLSTP2035DD-UNV	Type	
Project		Date	1/27/2020
Comments			
Prepared by	Kathleen Kenny, National Account 678-447-5208, kathleenkenny@eaton.com		

SPECIFICATION FEATURES

Construction

Fixture channel, cover and end plates are formed from cold rolled steel and offers all of the features needed for installation including multiple KO, a round J-box cover, wiring connectors and decorative end caps. The SLSTP is post painted for ease of handling. Decorative end caps snap-on for an improved aesthetic finish. The SLSTP is suitable for either single or continuous row applications.

Controls

Combine with energy saving products like occupancy sensors, daylighting controls, and lighting relay panels to maximize energy savings. Standard 0-10V continuous dimming driver works with any standard 0-10V control/dimmer. Dimming range is 10% to 100% and varies by control device. 120V drivers work with standard 120V phase cut dimmers.

See dimming compatibility chart posted on website. Optional simple occupancy sensors enable code compliance all in a simple package.

Electrical

Long-Life LED system with an energy-efficient electronic driver comes in UNV (120-277V) or 120V versions. Both drivers offer smooth dimming with a number of residential and commercial dimmers. LED's CCT are 3500K and 4000K with a CRI ≥ 80. Projected life is 50,000 hours at 70% lumen output.

Finish

Post painted with high reflective paint – standard.

Shielding

SLSTP offers a frost lens with decorative end caps for single and end of the row applications.

Installation

Fixture may be surface, suspended, or wall mounted. Multiple 7/8" K.O. on back and one on each end. See accessories below for ordering information.

Compliance

cULus listed for damp location rated. LED's comply with IESNA LM-79 and LM-80 standards. Under 4", ADA Compliant. DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details. RoHS compliant. Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements.

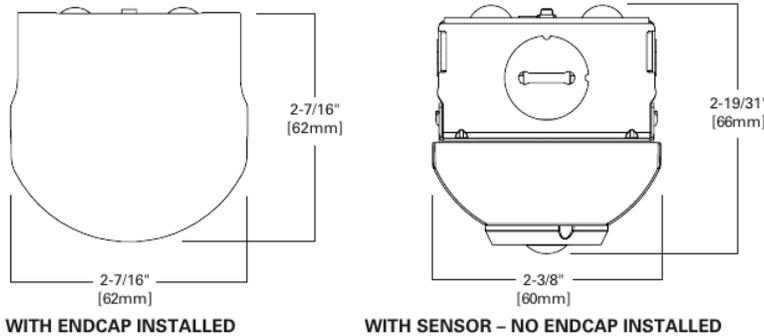

Warranty

Five-year warranty.

ALR - Recessed Linear

RECESSED LINEAR

Recessed Direct Mount 4" downlight wi...

Manufacturer: Cooper Lighting

Style/Series: ML4DM10LSFL9FS1E-TL40R2GMW

Attributes

Recessed Direct Mount 4" downlight with matte white reflector and flange, diffuse lens. Wet Location.

Type: Recessed Downlight

DIMENSIONS

Diameter: 4.25"

MATERIAL/FINISH

Finish: White

MISCELLANEOUS

Lead Time: In stock or 4 weeks

Warranty: Five year limited warranty

CUSTOM FIELDS

Finish: Matte White Flange Black Lens Frame

Delivered Lumens (LED) or Mean Lumens (Non-LED): 1000

Mount: Recessed

Lamp Type: LED

Lens/Shade: Clear diffuser

Lamp CRI: 90+

Trim: Round Lensed Pinhole

Reflector: NFL - 25 degree Narrow Flood

Voltage: 120

On Dimming System: No

Lamp Kelvin: 3000K

Dimming Type: NA

Notes

Efficacy: 83.7

Lamp Life/Fixture Life: 50,000

Fixture Input (Max. Watts): 9.4

Project		Catalog #	ML4DM10LSFL9FS1E-TL40R2GMW	Type	ALR-029-CL

HALO

ML4 Canless Downlighting System

A LED fixture fitting with remote driver suitable for direct mount without a housing or junction box can be used with round and square open, lens and lens wall wash trims providing various downlight and wall wash distributions.

Typical Applications

Residential • Hospitality • Retail

Product Certification

Refer to ENERGY STAR® Certified Products List.
Can be used to comply with California Title 24 High Efficacy requirements.
Certified to California Appliance Efficiency Database under JAB.

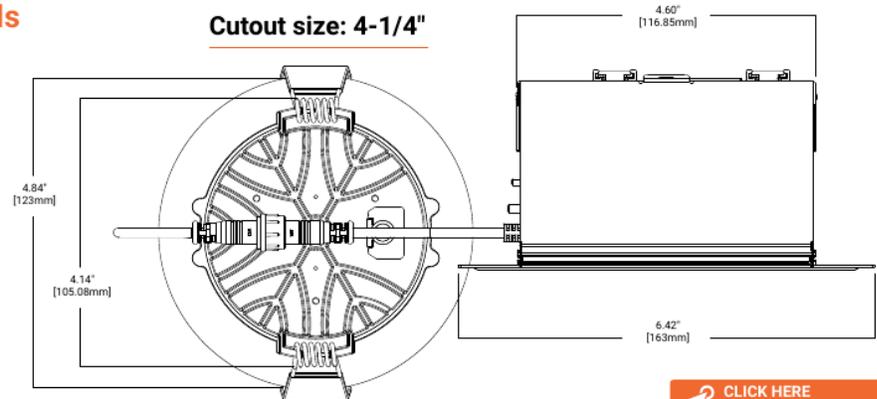

Product Features

Top Product Features

- Field selectable 2700, 3000, 3500, 4000 or 5000K CCT, 90 CRI minimum
- Optional full spectrum color, 95 CRI minimum
- Optional warm dimming, field selectable 2700 – 1800 or 3000 – 1800K CCT ranges
- Field selectable 600, 800 or 1000 lumens
- Field interchangeable 25°, 40°, 55° or wall wash distribution patterns, ships with 40 degree installed
- Installs from below, does not require a recessed housing or junction box
- Remote driver / junction box
- 120V LE/TE phase cut or 120-277V 0-10V dimming to 5% with select controls

Order Information

SAMPLE ORDER NUMBER: **ML4DM10LSFL9FS1E - TL41RMW**

A complete luminaire consists of a fixture fitting + trim, order separately.

Fixture Fitting

Catalog Number	Description
ML4DM10LSFL9FS1E	4" Canless, Lumen Select(600/800/1000lms), 5CCT selectable, 90CRI, 40° optic, 120V, LE/TE 5% Dim
ML4DM10LSFL9FSE010	4" Canless, Lumen Select(600/800/1000lms), 5CCT selectable, 90CRI, 40° optic, 120-277V 0-10V 5% Dim
ML4DM08LSFL9FS1E	4" Canless, Lumen Select(400/600/800lms), 5CCT selectable, 95CRI, 40° optic, 120V LE/TE 5% Dim
ML4DM06FLD2W1E	4" Canless, 600lms, Selectable D2W, 90CRI, 40° optic 120V LE/TE 5% Dim

<p>TL43R = 2" round lens pinhole TL44S = 2" square lens pinhole</p>	2G = Diffuse lens	<p>MWWB = Matte white flange, white lens frame MWBB = Matte white flange, black lens frame MBBB = Matte black flange, black lens frame BNBB = Brushed nickel flange, black lens frame ORBBB = Oil rubbed bronze flange, black lens frame GBBB = German bronze flange, black lens frame BCuBB = Brushed copper, black lens frame</p>
<p>TL45R = 2" round lens wall wash TL46S = 2" square lens wall wash</p>	6G = Linear spread lens	<p>MWWB = Matte white flange, white lens frame MWBB = Matte white flange, black lens frame</p>
Notes	Notes	Notes
(8) TL40R trim provides 1.15" lens regression to ML4 fixture.		

Product Specifications

Housing

- Die cast aluminum housing provides passive thermal cooling achieving L70 at 50,000 hours in IC and non-IC applications
- Retention springs holds housing securely in 3/8" to 1-1/2" thick ceilings, can be removed for service or replacement
- Not suitable for 2x4 framing

Optional Mounting Frame

- Pre-galvanized steel mounting frame locates fixture fittings during electrical rough-in and provides cutout guidance for drywall contractor
- Provides attachment of remote driver / junction box

LED Array

- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM at end points and 4 SDCM in the middle providing color accuracy and uniformity

VividTune

- Field selectable 2700, 3000, 3500, 4000 or 5000K CCT, factory set at 3000K CCT
- Optional full spectrum color, 95 CRI minimum with R1-R15 values ranging from 92 to 100, excellent TM-30 metrics; Rf ranging from 96-98 and Rg >98
- Field selectable 600, 800 and 1000 lumens

VividTune

- D2W™ dim-to-warm option shifts color temperature from 3000 to 1800 K CCT or 2700 to 1800 K CCT as fixture dims mimicking the black body dimming response of halogen or incandescent lamps

Trims

- Field interchangeable trims are available in 3-1/2" aperture conical and 2-inch round or square pinhole apertures
- Available in a broad range of painted or plated finishes, can be painted in the field to match any décor
- Magnetic attachment holds trim tightly to ceiling and minimizes light leaks
- Conical trim provides 1.15" lens regression to ML4 fixture.

Primary Optic

- Precision molded TIR optic organizes source flux into useful beams without stray lumens in the field
- Low glare, UGR < 17
- Two-piece construction with matte black mounting ring and polarized turn and lock mounting aligns optic to source and minimizes backlight in the housing
- Meets ENERGY STAR® color angular uniformity requirements, color deviation is typically less than 0.004 u' v'
- Available in narrow flood, flood, wide flood and asymmetric wall wash distributions, ships with flood optic factory installed, order alternate distributions or replacements separately

Media

- Integral media holder accepts (2) lens or louver 2" diameter 3.0mm thick color filters, lens or louvers
- Order media separately

Driver

- Integral 120V 60 Hz constant current driver provides noise free operation
- Continuous, flicker-free dimming from 100% to 5% with select leading or trailing edge 120V phase cut control
- Optional UNV 120-277V 50/60 Hz driver with 0 -10V analog dimming from 100% to 5%

Remote Driver / Junction Box

- Pre-galvanized steel driver/junction box with captive hinged junction box cover
- Listed for six #12 AWG 90° C splice conductors, two in, two out plus ground
- Two 1/2" conduit pry-outs
- Two Slide-N-Side™ non-metallic (NM) wire traps allow wiring outside the box
- Accepts NM cable types: 14-2, 14-3, 12-2, 12-3 (U.S.) and 14-2, 14-3, 12-2 (Canadian)
- Three 4-port push wire nuts with clear caps for quick and reliable mains voltage connections
- Integral mounting holes facilitate direct mounting to building structure or mounting frame

Compliance

- UL Certified US and Canada
- Damp and wet location listed, covered ceilings only and IP65, below the ceiling only with lens trims
- Airtight per ASTM-E283
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions per FCC 47CFR Part 15 consumer limits
- Contains no mercury or lead and RoHS compliant
- Photometric testing in accordance with IES LM-79-08
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11
- ENERGY STAR® certified, reference Certified Light Fixtures database
- Can be used for State of California Title 24 high efficacy LED compliance under JA8, reference Modernized Appliance Efficiency Database System (MAEDBS) for 2019 JA8 High Efficacy Lighting

Warranty

- Five-year limited warranty, consult
- website for details www.cooperlighting.com

LyteCaster LED Downlights are ideal general purpose downlighting solution, providing comfortable, quality light. Available in new construction and remodeler frame with interchangeable light engine that is offered in two lumen packages. The downlight is wet location listed and comes in 3 standard option.

Complete unit = Housing + Downlight or Adjustable Light Engine + Trim (order each separately)

Housing

example: L5R15AE1VB

Series	Lumens	Installation (all with AirSeal IC)	Dimming	Version
L5R	10	A	Z10U	VB
L5R LyteCaster 5" (for round and square configurations)	10 1000lm 15 1500lm	A New Construction w/ Screws AN New Construction w/ Nails	E1 Phase Control (ELV/TRIAC 120V) Z10U 0-10V (Universal 120-277V)	VB Version B
	10 1000lm 15 1500lm	R Remodeler		

Downlight Light Engine

example: L5R15930VB

Series	Lumens	CRI/CCT	Finishes	Version
L5R	10	930		VB
L5R LyteCaster 5" round downlight (compatible with square trims)	10 1000lm 15 1500lm	927 90 CRI / 2700K 930 90 CRI / 3000K 935 90 CRI / 3500K 940 90 CRI / 4000K 950 90 CRI / 5000K	— Specified with Trim below	VB Version B

Adjustable Light Engine

example: L5R15930WVB

Series	Lumens	CRI/CCT	Finishes	Version
L5RA				VB
L5RA Lytecaster 5" round adjustable (trim is integrated)	10 1000lm 15 1500lm	927 90 CRI / 2700K 930 90 CRI / 3000K 935 90 CRI / 3500K 940 90 CRI / 4000K 950 90 CRI / 5000K	W White Reflector / White Flange (integral to light engine for adjustable, do not specify Trim separately)	VB Version B

Features

Housing: UL listed for direct contact with thermal insulation. Airseal® housing minimizes air leakage to less than 2 CFM at 1.57PSF (or 75PA), which complies with the International Energy Conservation Code, and Washington State Energy Code (Section 502.4). This reduces heat loss and condensation in ceiling.

Housing (new construction): .026" galvanized steel. Access door for inspection of junction box.

Housing (remodeler): .032" aluminum. Integral retaining spring secures housing to ceilings up to 2" thick. Removable for access to junction box and ceiling plenum. 5 1/2" maximum for use in 2" x 6" joist construction and shallow plenum applications.

Junction Box (new construction): 2 1/2" x 5 3/4" x 2" (27 cu. in.) .032" galvanized steel. UL listed 90°C supply conductors. Rated for branch circuit wiring supplying connected luminaires (daisy chaining).

Junction Box (remodeler): 2 1/2" x 2 1/2" x 4 1/8" (29 cu in.) .031" galvanized steel. UL listed for 90°C supply conductors. Rated for branch circuit wiring supplying connected luminaires.

Retaining clips: Permits fast and easy installation of light engine/trim.

Lower frame and top cover: .026" galvanized steel. Accommodates ceilings up to 1" (25mm) thick. Deep integral lip is 3/8" (9.5mm) with four notches at 90° apart to simplify alignment. Locks into position along length of mounting bars with locking screws.

Driver - ELV /Triac: 120V, 50/60Hz. RoHS compliant, Class 2 power supply. Complies with FCC rules per Title 47 Part 15 (Class B) for EMI/RFI (conducted & radiated). Class A sound rating.

Driver - 0-10V: 120/277V, 50/60Hz. RoHS compliant, Class 2 power supply. Complies with FCC rules per Title 47 Part 15 (Class A) for EMI/RFI (conducted & radiated). Class A sound rating.

Mounting bars: .059" galvanized steel. Bars pivot for easy attachment and wire-in below ceiling line. Bars extend to accommodate 16" (406mm) to 24" (610mm) O.C. joist spacing. Bars can accommodate 12" (305mm) O.C. joist spacing after a slight field modification (see Instruction sheet). Features integral self tapping phillips/square drive screws for secure attachment to wood or metal construction. Also available with integral nails. Attaches to T-bar ceilings without the need of accessories. Bars installed on shortest dimension of frame, but can be easily repositioned 90° from original position.

Ceiling cutout: 5 1/2" (140mm).

ENERGY STAR®

Product family has ENERGY STAR® certification in all configurations.

Dimming Compatibility

See LED-DIM Specification Sheet.

Electrical

Lifetime: Expected lifetime 50,000 hours and backed by a 5-year warranty. (see Signify.com/warranties for details)

Labels

- cULus Listed Type I.C., frames are suitable for damp location and wet listed for use in covered ceilings.
- Trims are cULus suitable for damp location.
- Complies with Air Leakage.
- ENERGY STAR® certified.

L5R & L6S LyteCaster LED 5"

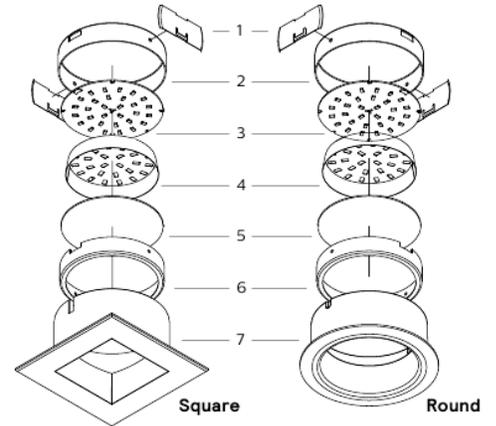

Round & Square downlights and Round adjustables (1000lm & 1500lm)

Light Engine

Components

- Retaining clips:** 29 gauge Stainless Steel, allows tool-less installation of light engine to trim.
- Engine housing:** (0.05") thick powder coated aluminum provides integrated thermal management allowing for a low profile at less than 3-1/2" tall.
- LED board:** High efficiency mid-flux LED's.
- Mixing chamber:** 98% reflective, highly diffuse film.
- Diffusion lens:** (0.06") thick acrylic opal lens provides an even source of illumination.
- Retaining ring:** (0.04") thick powder coated aluminum, secures module components.
- Reflector:** 30% glass reinforced injection molded polycarbonate is durable and provides a 70° cutoff to the source.

SC

Series

SC - Symmetry Series Die Cast LED Exit

Battery

N - Nickel Cadmium
A - AC Only

Face Options

1 - Single Double
U - Universal Two Faces, Backplate and Canopy

Letter Color

R - Red
G - Green

Stencil Face/Housing Color

W - White Stencil Face, White Housing
B - Black Stencil Face, Black Housing
WA - Brushed Aluminum Face, White Housing
BA - Brushed Aluminum Face, Black Housing
N - Brushed Aluminum Face, Natural Aluminum Housing

Model Designator¹

IC - Intelli-Charge Diagnostics
ICT - Self-Testing Diagnostics (non-audible, self-powered models only)
ICTA - Audible Self-Testing Diagnostics (self-powered models only)

Options²

2CKT1 - 120/120 Two Circuit VAC (AC-only models)
2CKT2 - 277/277 Two Circuit VAC (AC-only models)
BF - Buzzer/Flasher (emergency units only)
BZ - Buzzer (emergency units only)
DC - 12-48 VDC Input (AC only models)
DL - Damp Location Listing 0°C to 40°C
EX - Special Input Transformer (specify voltage & frequency)
FA - Fire Alarm Activated Flasher
FL - Emergency Mode Flasher (emergency units only)
SW - Special Wording/Graphics³
TP - Tamperproof Hardware and Bit
VRS - Vandal Resistant Lens with Tamperproof Hardware & Bit

Accessories⁴ (Order Separately)

CPKIT12W - Pendant Kit, 12" White, Includes Exit Adapter Plate
CPKIT12B - Pendant Kit, 12" Black, Includes Exit Adapter Plate
ICIR - Intelli-Charge Infra-Red Remote
T15TPTOOL - Tamperproof Screwdriver
PCS1 - Polycarbonate Vandal Shield
WG4 - Wire Guard, Surface Wall Mount
WG10 - Wire Guard, End Mount

Footnotes

- For self-testing models refer to ICT and ICTA options.
- Some option combinations may impact UL listing. Consult factory for specifics.
- Requires 'open-face' design.
- Consult Signify to confirm whether specific accessories are BAA-compliant.

codes and standards

- UL listed to standard 924
- UL damp location listing optional
- IBC, BOCA, and OSHA illumination standard
- NFPA 70 (National Electric Code)
- NFPA 101 (Life Safety Code)
- NEMA Premium certified
- Certified to the California Energy Commission in accordance with California law

construction

- Two piece die cast aluminum construction with NFPA compliant field selectable chevrons.
- Housing and stencil face castings are available with durable epoxy based powder coat paint or brushed aluminum finishes.
- A positive latching exit stencil face provides secure closure yet is easily accessible for installation, maintenance, and inspection.

installation

- The SC Series is available in single, double, and universal configurations.
- A mounting canopy is supplied to accommodate surface ceiling and end mounting.
- A universal knockout pattern is provided on the backplate for surface wall mounting.

electronics

- 120/277 VAC dual voltage input with surge protection is standard on all models.
- Self powered models feature the Intelli-Charge circuit where the charging system is microprocessor driven with software embedded diagnostic routine and temperature compensation.

- Self powered models include brownout detection, AC lockout, low voltage disconnect, AC Power indicator, charge status indicator, audible user-interface controls, visual LED system fault indicator, and tactile push to test switch.
- Additional equipment safety features include reverse battery polarity detection and protection, and reverse utility power detection and protection.
- All self-powered models include an on-board IR receiver for use with the optional hand-held remote (ICIR).
- Self-testing electronics (optional)
The diagnostic/charging platform with optional self-testing mode automatically runs a one minute self-test every 30 days and a 30 minute test on the sixth and twelfth month in accordance with NFPA 101. A one minute or 90 minute test may be initiated via the push to test switch on the unit or by activating the appropriate test command on the optional IR test device.
- Operating temperature range
AC only models: -40°F (-40°C) to 104°F (40°C).
Self-powered models - standard location: 65°F (19°C) to 85°F (30°C).
Self powered models - damp location: 32°F (0°C) to 104°F (40°C).
- Power consumption
AC only red: 0.032 A (120VAC), 0.015 A (277VAC), PF = 0.94.
AC only green: 0.035 A (120 VAC), 0.016 A (277VAC), PF = 0.92
Self powered red: 0.039 A (120 VAC), 0.018 A (277VAC), PF = 0.94.
Self powered green: 0.040 A (120VAC), 0.018 A (277VAC), PF = 0.94.

SC Cast aluminum LED exit sign

lamps

- Illumination of the stencil face is accomplished with long lasting, high output Light Emitting Diodes (LEDs).
- Hot spots and striations are eliminated by the internal "light chamber" allowing for even illumination in normal and emergency situations.
- Average legend illumination levels exceed 25fl (79 cd/m²) during normal and emergency operation.

options

- **2CKT1** – Available on AC only configured models to accommodate inputs from a normally on circuit and an AC emergency circuit from a generator or emergency inverter circuit limited to 120 VAC circuits.
- **2CKT2** – Available on AC only configured models to accommodate inputs from a normally on circuit and an AC emergency circuit from a generator or emergency inverter circuit limited to 277 VAC circuits.
- **BF** – This option enables the exit sign to buzz and flash together when the sign is operating under battery power. The buzzer and flashing rate is an approximate 50% duty cycle.
- **BZ** – This option enables the exit sign to buzz when the sign is operating under battery power. The buzzer rate is an approximate 50% duty cycle.
- **DC** – The DC option is reserved for AC only configured models and accommodates wiring to a remote emergency battery unit. The DC input is not polarity sensitive and accepts 12 to 48 VDC from a remote source.
- **DL** – Damp location listed products include various levels of corrosion protection on printed circuit board assemblies and other metallic parts. Environmental testing throughout a range of ambient temperature and 88% relative humidity.
- **EX** – The special input transformer option allows for input voltage and frequencies beyond the standard 120/277 VAC, 60 Hz input.

battery

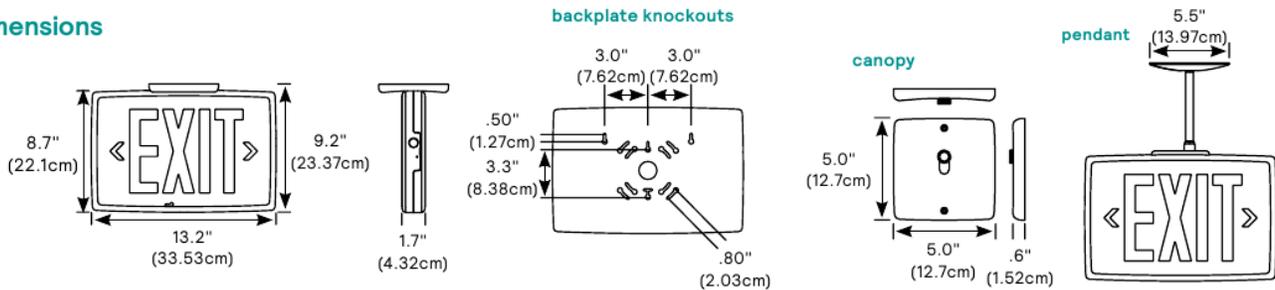

- Maintenance free sealed nickel cadmium battery
- Provides a minimum of 90 minutes of emergency power.

warranty

- Five full year warranty on electronics and unit.

- **FA** – This option provides a two-wire harness for the electrical connection to the fire control panel. Should the fire panel activate an alarm, the exit sign will flash at a rate of approximately 50% duty cycle.
- **FL** – This option causes the exit sign to flash when the sign is operating under battery power. The flashing rate is approximately a 50% duty cycle.
- **TP** – The tamper proof option provides torx T15 hardware with center pin reject and the bit required to secure and access the equipment for future servicing.
- **ICT** – The self-testing option enables a periodic self-test of the equipment where a test routine is established to perform a one-minute test every thirty days with a 30-minute test performed on the sixth and twelfth month in accordance with NFPA 101. Equipment readiness faults are indicated with a visual LED display.
- **ICTA** – The audible self-testing option enables a periodic self-test of the equipment where a test routine is established to perform a one-minute test every thirty days with a 30-minute test performed on the sixth and twelfth month in accordance with NFPA 101. Equipment readiness faults are indicated with a visual LED display and an audible alarm.
- **BAC** – This option meets the requirements of the Buy American Act of 1933 (BAA).

 GenFrame™ DW/MA-16
 GenFrame™ DW/MA-18
 GenFrame™ DW/MA-22

Product meets ANSI 250.8 requirements

Gensteel offers a full range of steel frames in standard or custom sizes and profiles. Steel frames are available for dry wall or masonry applications in 12, 14, 16, and 18 gauge for 1¾ in. (45 mm) doors and in 22 gauge for 1½ in. (35 mm) doors. All standard frames are manufactured from galvanized steel and are reinforced to receive specified architectural hardware in accordance to ANSI A115 standards. Frames are also available in stainless steel, lead-lined (x-ray) and G90 galvanized steel.

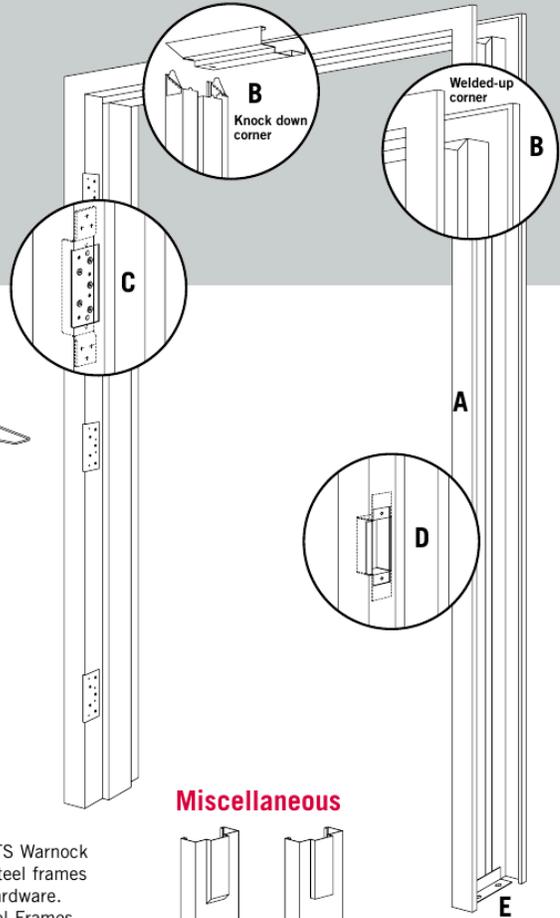

Gensteel also offers a full line of frames with thermal break for cold climate exterior applications.

General Specifications

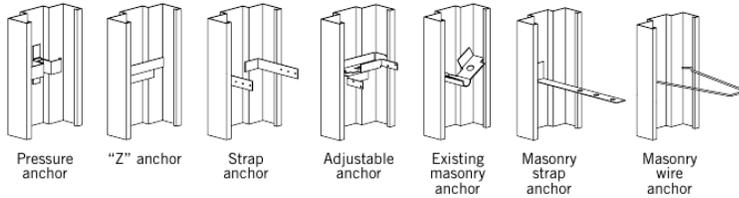

- Standard frames are available as welded-up or knock down (KD).
- Hinge jambs are prepared and reinforced to receive 3 standard weight 4½" x 4½" (114 mm x 114 mm) butt hinges. Hinge reinforcements can easily be converted to accommodate heavy weight hinges.
- Strike jambs are prepared and reinforced to receive one standard 4¾" (124 mm) strike in accordance to ANSI A115.1.
- Hinge and strike jambs are supplied with appropriate wall anchors.
- On welded-up frames, all welded joints are ground smooth and touched-up with primer paint to provide a seamless look.

Frame Construction

- A 12, 14, 16, 18 or 22 gauge galvanized steel.
- B Knock down or welded-up corners.
- C 10 gauge high frequency dual purpose hinge reinforcement with return bend for added strength. Can easily be converted to accommodate heavy weight hinges.
- D 18 gauge ASA strike reinforcement with closed back.
- E 18 gauge floor anchor.
- High precision **QUICKFIT™** certified assembly.

GenFrame™ DW/MA-22	X				

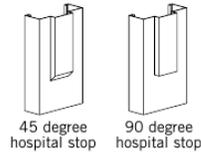

Fire Labels

Gensteel fire labeled steel frames are approved by both Intertek Testing Services (ITS Warnock Hersey) and Underwriters Laboratories (UL) Fire Labeling Programs*. Fire labeled steel frames must be installed with an equivalent fire labeled door with approved fire listed hardware. For fire labeling restrictions and limitations refer to the Fire Labeling Guide for Steel Frames.

* 22 gauge frames cannot be fire rated

Attributes

Standard double rabbet hollow metal frame with welded corners

Type: Exterior/Interior Hollow Metal Door Frames

DIMENSIONS

Dimension Explanation: Refer to Design Guideline Drawings Door Schedule

MATERIAL/FINISH

Material Composition: 16-gauge (0.053-inch) thick steel sheet for interior and exterior applications; Exterior frames shall be 0.30 ounces per square foot per side, hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness
Color: Refer to Design Guideline Drawings

Finish: Manufacturer Standard Factory-primed, field-painted (See Project-specific Mark # for paint color)

PERFORMANCE

Accessibility Compliance : ADA and ANSI A117.1 current version

Acoustical Performance: Refer to Brand Design Guideline Standards

Best Practices: Recycled content

Fire/Smoke Rating: ASTM E152; NFPA 80 "Standard for Fire Doors, Fire Windows."

Quality Standards: ASNS/SDI A250.8 Recommended Specifications for Standard Steel Doors and Frames"

Structural Performance: ANSI/SDI Level 2, Performance Level B (Heavy-Duty)

MISCELLANEOUS

Lead Time: 4 Weeks

Warranty: 1 Year from Purchase Date

CUSTOM FIELDS

Frame Type: Standard Double Rabbet Hollow Metal Frame with Welded Corners

Finish: Primed

Fire Rating: Actual rating to be determined by the Architect based on location and code requirements.

Quality Standards: NA

Hardware: Refer to Design Guideline Drawings Door Schedule and hardware specifications. Prepared for ANSI strikes and pre-drilled for door silencers/ gasketing as applicable.

Notes

Product Data Web Link: <https://tinyurl.com/efz45xtd>

Fastening: Lock in stud anchors to secure frame to perimeter construction

Reinforcement: Concealed metal reinforcements for hardware as required and security anchor system on strike jamb

All Exterior Door Frames, Public Space, Back-of-House, and Guest Room Entry Door Frames shall have continuously welded corners.

Special Instructions

Clearances: 1/8" at jambs and heads; 3/4" at bottom; 1/4" at meeting edges of pairs of doors.

SPEED QUEEN MULTI-HOUSING

QUANTUM® GOLD COIN DROP INSTALLED, PREP FOR COIN, PREP FOR CARD COMMERCIAL FRONT CONTROL FRONT LOAD WASHER

Built for Reliable Performance

Engineered and built like no other, the Speed Queen front load washer is designed to be everything people thought a washer couldn't be, beginning with its revolutionary suspension and sensing technology. This groundbreaking innovation manages and redistributes out-of-balance loads to deliver uninterrupted cycles, virtually eliminate vibration and operate so quietly neighboring residents won't even know it's running. It also touts an incredible 440 G-Force extraction speed to maximize moisture removal, reduce dry times and minimize utility costs. And as if that's not game-changing enough, this smooth-running, laundry-optimizing machine delivers increased water efficiency. It's everything you never knew it could be. Front controlled products have met every design standard to be 100% ADA compliant.

- Revolutionary balancing technology
- Industry leading 1200 RPM spin speed exerts 440 G-force extraction
- Integrated meter case
- Extra-wide 15.5" door opening and 180° door swing
- Rugged suspension system
- Easy-to-read digital display
- Large capacity meter case standard
- Multi-level vend pricing
- Individual cycle modifier keys
- Durable stainless steel tub standard
- Four-compartment soap dispenser
- Wash Alert™ capability

ENERGY STAR® Certified Washer

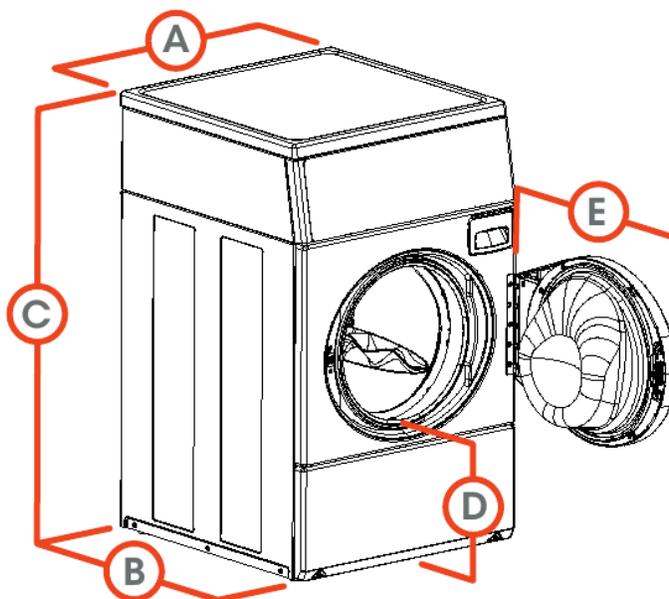

The cutting edge Quantum control system from Speed Queen gives you the freedom to manage laundry your way with the power to achieve unmatched levels of revenue. Quantum Gold provides users with additional cycle choices while offering new options to help lower operating costs and incorporates tools and options to increase revenue.

Speed Queen® Multi-Housing

Micro Display Commercial Stack Dryer

Front Control

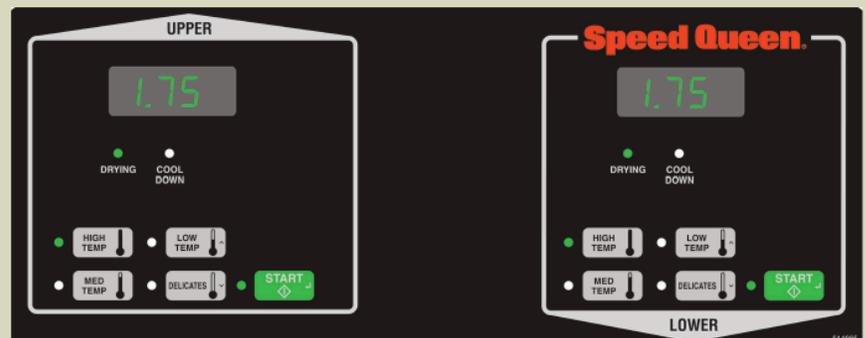

BUILT FOR RELIABLE PERFORMANCE

- Industry's largest door opening 2.06 sq. ft. (1914 cm²)
- Quiet, efficient blower system
- Door is reversible for installation flexibility
- End-of-cycle signal
- ADA compliant (bottom dryer only)
- High efficiency exhaust blower with superior airflow 220 cfm (105 liters/sec)
- 100% serviceable from the front
- Space-saving narrow cabinet 26-7/8" (683 mm)
- Upfront lint filter easy to clean and secured
- Durable galvanized steel cylinder

MICRO DISPLAY CONTROL

- Easy-to-read digital display
- Touch pad selection combines temperature and cycle
- Manually program and audit
- Card and coin transactions

Alitia Cross

Email: No.Email.398

Office Phone: 276.698.6254

Attributes

Millwork Laminate

Item Type: Plastic Laminate

Description: Type 107 General Purpose (HGS) Laminate

Manufacturer: Panolam / Pionite

Model: HP565

Dimensions: 0.048" Plus Minus 0.005" Thickness, Standard Sheet

Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"

Color: Storm Gray

Finish: Textured/Suede (SD)

Material Composition: Melamine impregnated decorative surface papers combined with fire retardant phenolic treated kraft paper

Fire/Smoke Rating: ASTM E-84 Flame Spread 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded.

Best Practices: 17% Post-consumer content, Green Guard Certified Quality Standards: Architectural Woodwork Standards (AWS); ANSI A161.2 "Standards for Fabricated High Pressure Decorative Laminate Countertops." NEMA LD3 "High Pressure Decorative Laminates"

Accessories: Manufacturer's recommended adhesive

Warranty: 1 Year

Notes: Recommended substrates for laminates are particleboard, medium density fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS: All substrates should be sanded smooth, and should be clean and free of oil or grease and uniform in thickness

Manufacturer: N/A

Style/Series: Laundry Shelving

Attributes

Laundry Shelving - Plastic Laminate Clad Custom Millwork consisting of wall mounted shelving

Type: Public Space Millwork

DIMENSIONS

Dimension Explanation: Refer to Design Guideline Drawings

MATERIAL / FINISH

Material Composition: Grain direction - horizontal

Color: Colors to be selected by Architect; refer to Implementation Guide.

Finish: Finishes to be selected by Architect; refer to Implementation Guide.

PERFORMANCE

Accessibility Compliance : ANSI A117.1 current version, ADAAG

Acoustical Performance: N/A

Best Practices: Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.

Classification: Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. MDF: ANSI A208.2, Grade 130.

Quality Standards: Architectural Woodwork Standards (AWS)

Grade: Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.

MISCELLANEOUS

Lead Time: TBD

Notes / Special Instructions: Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include ALL equipment, glazing, accessories, lighting, power/data etc.

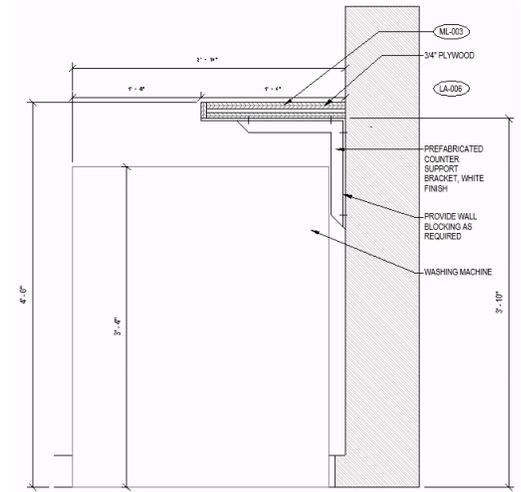

CUSTOM FIELDS

Pattern: Color to be selected by Architect; refer to Implementation Guide.

Design & Construction: All listed millwork must be manufactured in accordance with the information provided herein.

Lighting: Not Applicable

Fabric Wrapped Panels: Not Applicable

MISCELLANEOUS

Eco-Feature(s) *as per manufacturer: Formulated without lead, mercury or chromates. 0 g/L VOC (US EPA) | GREENGUARD Gold Certified | LEED v4 VOC & Emissions Compliant, Materials Ingredient Declaration available.

Lead Time: Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.

Warranty: Limited Lifetime

NOTES

Manufacturer Data Sheet: <https://tinyurl.com/y66pjxfe>

Special Instructions: Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for

which they are intended. Required Wall Finish Levels: All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish. All walls to receive Paint (or light to med weight wall covering) are to have a level 4 Gypsum Board Finish. All walls to receive Gloss, enamel paint, or Murals to have a Level 5 Gypsum Board Finish.

ProMar[®] 200 Zero V.O.C.

Interior Latex Flat

B30-Series

CHARACTERISTICS

ProMar[®] 200 Zero V.O.C. Interior Latex Flat is a durable, professional quality, interior vinyl acrylic finish for use on walls and ceilings of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors
To optimize hide and color development, always use the recommended P-Shadow primer.

Coverage: 350-400 sq. ft. per gallon
@ 4 mils wet
1.4 mils dry

Drying Time, @ 77° F, 50% RH:
Touch: 1 Hour
Recoat: 4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent.

Finish: 1.5-3.5 units @ 85°

Tinting with CCE only:

Base:	oz. per gallon:	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		Do Not Tint

Extra White B30W12651

(may vary by color)

V.O.C. (less exempt solvents):

Less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Weight Solids: 52 ±2%

Weight per Gallon: 11.45 lbs

Flash Point: N.A.

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months, unopened

WVP Perms (US): 70.83 grains/(hr ft² in Hg)

Anti-microbial

This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 06/29/2023, Complies with:

OTC	Yes
OTC Phase II	Yes
S.C.A.Q.M.D.	Yes
CARB	Yes
CARB SCM 2007	Yes
CARB SCM 2020	Yes
Canada	Yes
LEED[®] v4 & v4.1 Emissions	Yes
LEED[®] v4 & v4.1 V.O.C.	Yes
EPD-NSF[®] Certified	Yes
MIR-Manufacturer Inventory	Yes
MPI[®]	Yes

APPLICATION

Apply at temperatures above 50°F
No reduction needed.

Brush:
Use a nylon-polyester brush.

Roller:
Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on Sherwin-williams.com

Spray - Airless:
Pressure 2000 p.s.i.
Tip .017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

ProMar[®] 200 Zero V.O.C. Interior Latex Flat

SURFACE PREPARATION

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceiling, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations – usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts clean water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with clean water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of clean water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-Photochemically reactive.

Before using, carefully read **CAUTIONS on label**.

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage.

FIRST AID: In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

Required Wall Finish Levels: All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish. All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish. All walls to receive Gloss, Enamel Paint, or Murals to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C. Interior Latex Semi-Gloss

B31-Series

**SHERWIN
WILLIAMS®**

CHARACTERISTICS

ProMar® 200 Zero V.O.C. Interior Latex Semi-Gloss is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors
To optimize hide and color development, always use the recommended P-Shadow primer.

Coverage: 350-400 sq. ft. per gallon
@ 4 mils wet
1.5 mils dry

Drying Time, @ 77° F, 50% RH:
Touch: 1 Hour
Recoat: 4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent.

Finish: 25-35 units @ 85°

Tinting with CCE only:

Base:	oz. per gallon:	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		

Do Not Tint

Extra White B31W12651

(may vary by color)

V.O.C. (less exempt solvents):

Less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ±2%
Weight Solids: 50 ±2%
Weight per Gallon: 10.30 lbs
Flash Point: N.A.
Vehicle Type: Vinyl Acrylic
Shelf Life: 36 months, unopened
WVP Perms (US): 85.75 grains/(hr ft2 in Hg)

Anti-microbial

This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 06/29/2023, Complies with:

OTC	Yes
OTC Phase II	Yes
S.C.A.Q.M.D.	Yes
CARB	Yes
CARB SCM 2007	Yes
CARB SCM 2020	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Manufacturer Inventory	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F
No reduction needed.

Brush:
Use a nylon-polyester brush.

Roller:
Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on Sherwin-williams.com

Spray - Airless:
Pressure: 2000 p.s.i.
Tip: .017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

ProMar[®] 200 Zero V.O.C. Interior Latex Semi-Gloss

SURFACE PREPARATION

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceiling, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations – usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts clean water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with clean water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of clean water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-Photochemically reactive.

Before using, carefully read **CAUTIONS on label**.

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage.

FIRST AID: In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

INTERIOR WALL PAINT

Item Type: Guest Corridor and Public Space Wall Paint

MATERIAL/FINISH

Color: SW 7064 Passive
Finish: Eg-Shel

PERFORMANCE

Best Practices: Low-VOC, UL Greenguard Certified
Quality Standards: Interior paint: Comply with Green Seal GS-11;
MPI Architectural Painting Specification Manual; 40 CFR, Part 59,
Subpart D 2001, National Volatile Organic Compound Emission
Standards for Architectural Coatings

MISCELLANEOUS

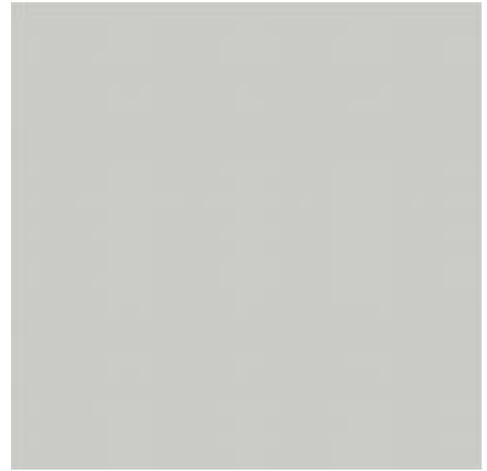

Eco-Feature(s) *as per manufacturer: Formulated without lead,
mercury or chromates.

Lead Time: Standard lead times are 3-5 days from receipt of
purchase order. Lead time should be confirmed by the
manufacturer.

Warranty: Limited Lifetime

NOTES

Manufacturer Data Sheet: <https://tinyurl.com/ysrhnnh3>
Special Instructions: Primer, undercoat, block filler, finish coat(s) are
to be compatible and of the same manufacturer. All primers and
undercoats are to be tinted to 50% lighter than the selected and
approved finish coat color. All finish coats are to be tinted 25%
darker than the primer coat until approved finish coat color is
achieved. When the color schedule calls for the use of DEEP TONES
(interior and/or exterior), it is the responsibility of the painting
contractor to utilize the appropriate Deep Base Primers as
manufactured by the painting company for use on the substrate for
which they are intended. Required Wall Finish Levels: All walls to
receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering)

are to have a Level 4 Gypsum Board Finish. All walls to receive Gloss, Enamel Paint, or Murals to have a Level 5 Gypsum Board Finish.

ProMar® 200

Zero V.O.C. Interior Latex Primer

B28W02600 White

**SHERWIN
WILLIAMS.**

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Primer is a professional quality, interior vinyl acrylic primer.

This primer has been designed for use with the **ProMar Series Interior Latex topcoats** providing a complete system.

For use on these interior surfaces:

- Wood
- Drywall
- Plaster
- Masonry
- Primed Metal
- Previously painted surfaces

Color: White
For best topcoat color development, use the recommended "P"-shade primer. Check color before use.

Coverage: 400 sq.ft.per gallon
@ 4.0 mils wet;
1.0 mils dry

Drying and recoat times are temperature, humidity, and film thickness dependent

Drying Time, @ 77°F, 50% RH:

Touch: 1 hour
Recoat: 4 hour

Finish: 0-5 units @85°

Tinting: Requires ColorCast Ecotoner for tinting.

For best topcoat color development, use the recommended "P"-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotoner can be used to approximate the topcoat color. Check color before use.

Spray—Airless:
Pressure 2000 p.s.i.
Tip .017-.021 inch

APPLICATION TIPS

When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd-oil, water based epoxy, or solvent based epoxy coating on architectural applications.

SPECIFICATIONS

Drywall:

- 1 coat ProMar 200 Zero V.O.C. Latex Primer
- 2 coats Of appropriate finishes

Previously Painted:

- 1 coat ProMar 200 Zero V.O.C. Latex Primer
- 1-2 coats Of appropriate finishes

ProMar® 200

Zero V.O.C. Interior Latex Primer

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking - Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall - Fill cracks and nail holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block - All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Plaster - Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

SURFACE PREPARATION

Mildew - Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

CAUTIONS

For interior use only.

Protect from freezing.

Non-photochemically reactive.

Not for use under wallpaper.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA: Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

TA - Grab Bars

GRAB BARS

Manufacturer: Bobrick
Style/Series: Bobrick Swing-Up Grab Bar

Sales Rep

Primary

Dean Armstrong
Email: dean.armstrong@ferguson.com
Office Phone: 855-521-1805
Mobile Phone: 949-289-3058

Attributes

Item Type: Swing-Up Grab Bar
Model: B-4998

MATERIAL/FINISH

Finish: Satin Stainless Steel

PERFORMANCE

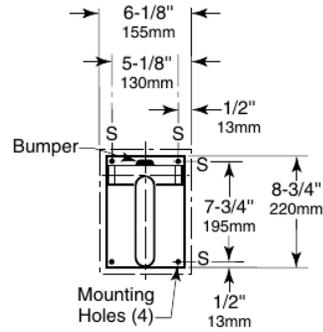

Accessibility Compliance : ADA

NOTES

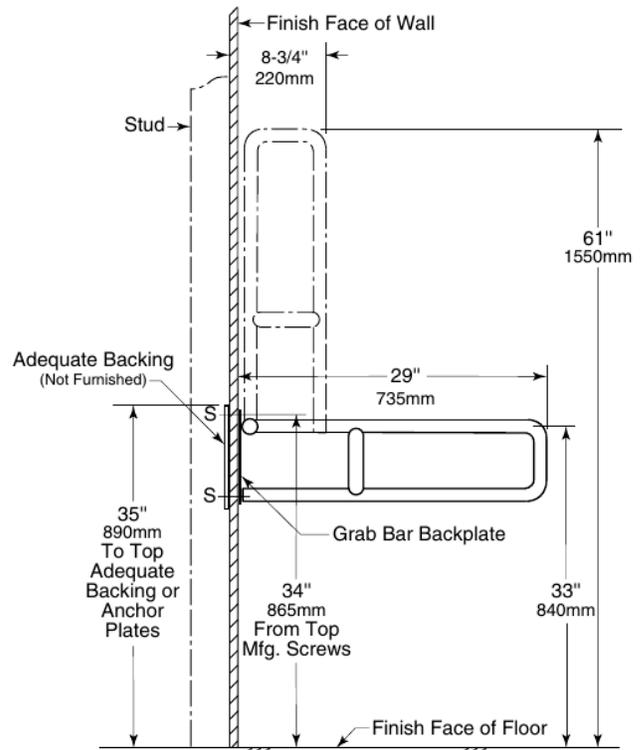

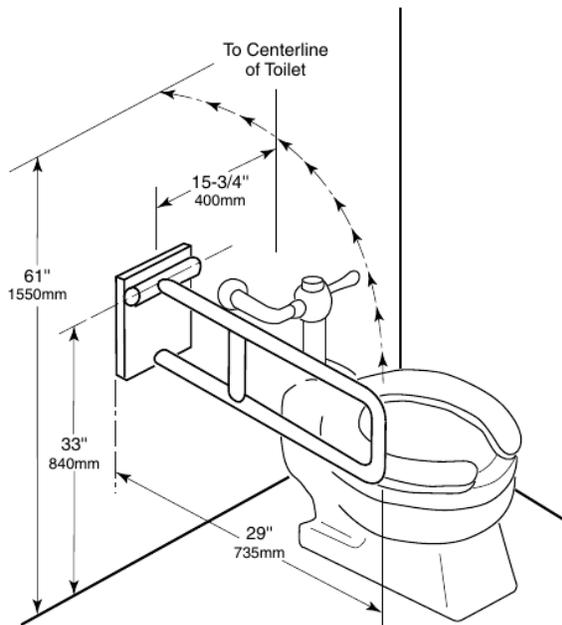

Warranty: See Website

Specify Finish Required: Satin-finish
 Satin-finish with peened gripping surface; add suffix .99 to model number

Grab Bar Backplate

MATERIALS:

Grab Bar — 18-8, Type-304, 18-gauge (1.2mm) stainless steel tubing with satin-finish. 1-1/4" (32mm) outside diameter. Ends are heliarc welded to flanges.

Backplate — 18-8, Type-304, 3/16" (5mm) thick, satin-finish stainless steel with four screw holes for attachment to wall.

continued . . .

OPERATION:

Swing-up grab bar is manually raised for approach or departure and lowered to horizontal position for support; once grab bar is raised to the full upright (vertical) position, counterweighted design prevents grab bar from falling back down to the full horizontal position.

STRENGTH:

Swing-up grab bar can support loads in excess of 500 pounds (227kg) if properly installed.

Safety Warning: Grab bars are no stronger than the anchors and walls to which they are attached and, therefore, must be firmly secured in order to support the loads for which they are intended. To avoid potential injury, the building owner or maintenance personnel should remove the grab bar from service if the grab bar is not adequately secured to wall or if there is any observe damage to the welds.

INSTALLATION:

Provide concealed anchor device or backing as specified or required in accordance with local building codes before wall is finished. Fasten grab bar to anchor device or backing. Concealed anchor devices and mounted screws are not included with Bobrick grab bars and must be specified as an optional accessory.

SPECIFICATION:

Grab bar shall be Type-304 stainless steel with satin finish. Grab bar shall have 18-gauge (1.2mm) wall thickness and 1-1/4" (32mm) outside diameter. Backplate shall be 3/16" (5mm) thick stainless steel, equipped with screw holes for attachment to wall. Swing-up grab bar shall be manually raised for approach or departure and lowered to horizontal position for support; counterweighted design shall prevent grab bar from falling back down to the full horizontal position once grab bar is raised to the full upright (vertical) position.

Swing-Up Grab Bar shall be Model _____ (insert model number) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

TC - Tile Ceiling

TILE CEILING

Acoustical Ceiling Tile

Manufacturer: USG

Style/Series: Clean Room Class 100 (ISO C5) Acoustical Panels with Climaplus Performance, Item No. #3260

Sales Rep

Primary

Ado Ade

Email: No.Email.329

Office Phone: (845) 786-2820

Attributes

Acoustical Ceiling Tile

Type: N/A

DIMENSIONS

Width: 2'-0"

Length: 2'-0"

Thickness: 5/8"

MATERIAL/FINISH

Material Composition: Wet formed mineral fiber.

Color: White

Finish: Smooth-textured panel with an embossed, vinyl-laminated face.

PERFORMANCE

Acoustical Performance: 0-0.55 NRC, 35 CAC

Best Practices: USDA Certified Biobased Product, 55% Recycled Content

Fire/Smoke Rating: ASTM E-1264 Classification (Class 100: Type X, Pattern GI), ASTM E-84, Class A

Thermal Performance: Resistance: R-1.6

MISCELLANEOUS

Warranty: 30 Year Limited Warranty.

USG Donn Brand Suspension System and USG panels and tile with Climaplus performance, when used together, to be free from defects in materials and workmanship at time of manufacture.

CUSTOM FIELDS

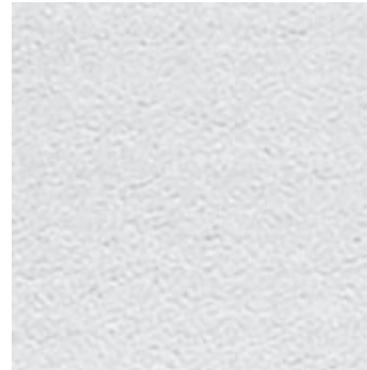

Content: Wet formed mineral fiber.

Edge: Square

Suspension: USG Donn Brand Suspension System

Product: Clean Room Class 100 (ISO C5) Acoustical Panels with Climaplus Performance, Item No. #56099.

Grid: US DX/DXL

Finish: Smooth-textured panel with an embossed, vinyl-laminated face.
Quality Standards: NA

Acoustical Suspension System

TO ORDER SAMPLES, GO TO USG.COM OR CGCINC.COM

Flat White
050

FEATURES AND BENEFITS

- USG Clean Room™ Class 100 and Class 10M-100M panels have an embossed, vinyl-laminated face with sealed back and edges for use in Class 100 (ISO 5) or 10M-100M (ISO 7) Clean Rooms.
- USDA Certified Biobased Product.⁸
- Firecode® product designed to meet life-safety codes.
- ClimaPlus™ 30-year limited system warranty against visible sag.

APPLICATIONS

- Clean Rooms
- Laboratories
- Surgical areas/emergency rooms
- Kitchens/food prep areas (Class 100 only)

SUBSTRATE

- Wet-formed mineral fiber

Smooth-Textured Panel, Class 100

Smooth-Textured Perforated Panel, Class 10M-100M

Maintenance
 Can be cleaned easily with a damp sponge, mild detergent and water. Do not use acetate, ammonia, or highly concentrated chlorine, bromide or other harsh chemicals.

Metric sizes available
 Contact sales for minimum quantities and lead times.

Notes

- For details, see LEED report tool at usgdesignstudio.com or cgcdesignstudio.com.
- Fire-rated items: see UL design details.
- LR values are shown as averages.
- NRC rating for USG Clean Room™ ClimaPlus™ Class 100 panels is 0.10. USG does not consider a ceiling panel to be acoustically rated if NRC is less than 0.50.
- Field-cut edges of USG Clean Room™ panels may be sealed with white latex paint.
- Clean Room-rated applications require a suspension system with gasketed tee flanges such as USG Donn® Brand CE™.
- Not intended for kitchen/food prep applications. Use unperforated product (Class 100)—item numbers 56099 and 56091.
- This product has achieved both BioPreferred initiatives: Federal Procurement Preference and Certified Product Labeling. See the complete listing of all USG ceiling panels on biopreferred.gov website.

FLOOR PROFILES

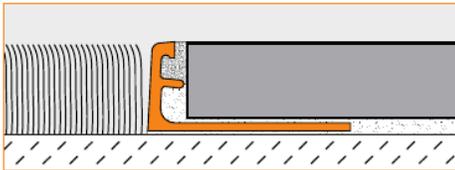

INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

FINISHING, EDGE PROTECTION, AND TRANSITIONS

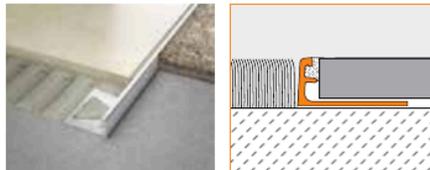

Because ceramic and stone tiles are inherently brittle, their exposed edges can chip and crack if left unprotected. Transitions between floor surfaces and at thresholds are particularly vulnerable to damage. Schluter-Systems offers a variety of profiles to provide edge protection and transitioning at thresholds and between adjacent surfaces, resulting in durable, maintenance-free tiled coverings. The profiles can be grouped into two categories: transitions between same-height surfaces and transitions between different-height surfaces

Application and Function

Same-height Transitions

1.1 Schluter®-SCHIENE is designed to provide edging for tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE is available in stainless steel, solid brass, aluminum, and anodized aluminum. The profile features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage. SCHIENE, in solid brass, aluminum, and anodized aluminum, features a 5° sloped top flange and fillet at the anchoring leg/vertical section interface to enhance edge protection by reducing stresses on the tile, and, in sizes greater than 1/4" (6 mm), features an

1.1 Schluter®-SCHIENE

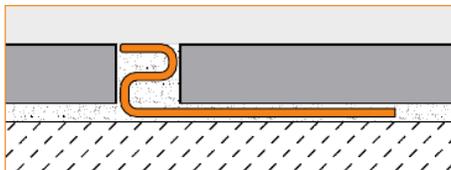

1.6 Schluter®-DECO

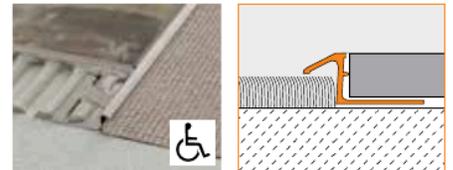

1.3 Schluter®-RENO-T

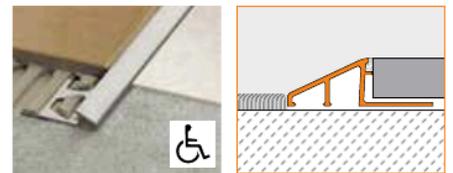

integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of SCHIENE, in all materials, is available with a special radius perforation "R" so that the profile can be used to form curves.

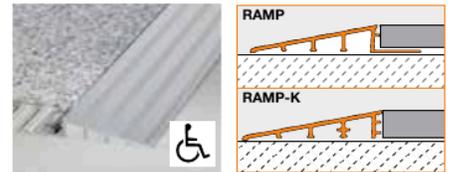

1.6 Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet. The profile is available in stainless steel, solid brass, chrome-plated

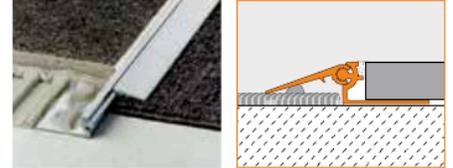

1.4 Schluter®-RENO-TK

1.2 Schluter®-RENO-U

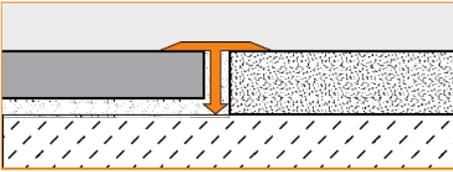

1.8 Schluter®-RENO-RAMP-K

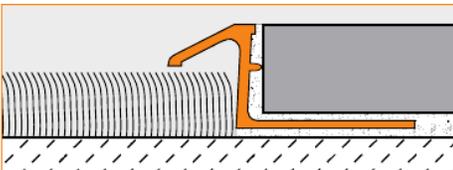

1.7 Schluter®-RENO-V

solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" (6 mm)-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc. The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation "R" so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.

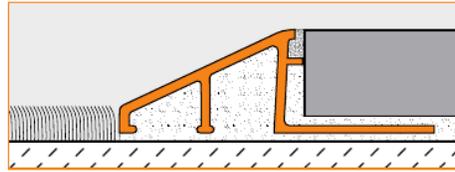

1.3 Schluter®-RENO-T is designed to provide transitions between existing same-height, hard-surface floor coverings (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.), primarily in retrofit applications. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-T is installed within the existing joint cavity and overlaps adjoining surface materials, thus preventing edges from becoming damaged when subjected to mechanical stress. RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

Different-height Transitions

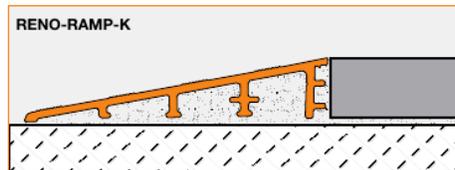

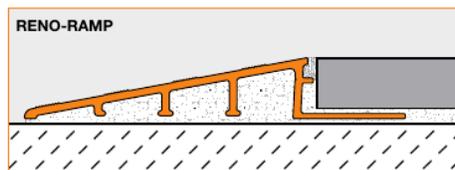

1.4 Schluter®-RENO-TK is designed to provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-TK features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface to eliminate trip hazards and protect tile edges. The 1/4" (6 mm) channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. All sizes of the RENO-TK are compliant with the Americans with Disabilities Act (ADA). RENO-TK, in anodized aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of RENO-TK, in solid brass and anodized aluminum, sizes 60 to 100, is available with a special radius perforation "R" so that the profile can be used to form curves.

1.2 Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges. The leading edge of the profile abuts the lower surface covering, typically VCT. RENO-U, in aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. In installations where the leading edge abuts a lower surface covering, all sizes of RENO-U, except the 3/4" (20 mm) and 11/16" (17.5 mm), are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 3/4" (20 mm), 11/16" (17.5 mm), and 9/16" (15 mm) sizes are not ADA-compliant.

Note: When using Schluter® uncoupling membranes with RENO-U profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.

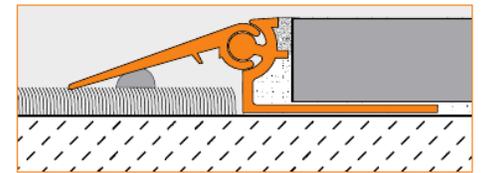

1.8 Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used (e.g., bakeries, hospitals, etc.). The profile is available in anodized aluminum. RENO-RAMP features a trapezoid-perforated

anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts. RENO-RAMP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Note: When using Schluter® uncoupling membranes with RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.

Schluter®-RENO-RAMP-K is a variant of the profile without an anchoring leg. RENO-RAMP-K is installed adjacent to existing floor coverings, e.g., retrofitting between existing floor coverings and bare concrete without having to disturb the existing flooring. All sizes of RENO-RAMP, except sizes 9/16" (15 mm) and 3/4" (20 mm), are compliant with the Americans with Disabilities Act (ADA).

1.7 Schluter®-RENO-V is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile is available in anodized aluminum. RENO-V features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint. The profile protects tile edges and provides a sloped surface to eliminate trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. RENO-V is also suitable for heavy-duty applications (e.g., entrances to garages or loading docks). In such cases, the adjustable arm is backfilled with mortar.

Material Properties and Areas of Application

Schluter edge-protection and transition profiles are resistant to most chemicals encountered in tiled environments. In special cases, the suitability of a proposed type of profile must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below:

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride, and brine concentrations.

Chrome-plated solid brass is ideal for matching chrome fixtures. Surfaces must be protected against abrasion or scratching.

Solid brass can sustain high mechanical stresses, as well as most chemicals commonly encountered in tiled environments. Solid brass that is exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use, but is not color-stable in exterior applications. The surface is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Cutting Profiles

Observe all safety instructions and standards as directed by the cutting tool manufacturer, including protective eyewear, hearing protection, and gloves.

Always measure carefully and dry fit the profiles, corners, and connectors to ensure proper fit and alignment prior to setting tile.

Aluminum profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Chop saw or Miter Saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Stainless steel profiles may be cut using any of the following options:

- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Band Saw** with a metal cutting blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Installation

SCHIENE, JOLLY, DECO, RENO-TK, RENO-U, RENO-RAMP, and RENO-V

1. Select the profile according to tile thickness and format.

Note: When using Schluter® uncoupling membranes with RENO-U and RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.

2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.

For RENO-U and RENO-RAMP, fill the cavity beneath the sloped section of the profile with thin-set mortar. Follow this step when RENO-V is used in heavy-duty applications, as well.

3. Press the perforated anchoring leg of the profile into the mortar and align.
4. Trowel additional thin-set mortar over the perforated anchoring leg to ensure full coverage and support of the tile edges.
5. Solidly embed the tiles so that the tiled surface is flush with the top of the profile; the profile should not be higher than the tiled surface, but rather up to approx. 1/32" (1 mm) lower.
6. Set the tile to the integrated joint spacer, which ensures a uniform joint of 1/16" - 1/8" (1.5 - 3 mm). For DECO and stainless steel profiles, leave a space of approximately 1/16" - 1/8" (1.5 - 3 mm).
7. Fill the joint completely with grout or setting material.
8. Remove grout or mortar residue from the visible surface of the profile.

RENO-RAMP-K

1. Fill the cavity beneath the sloped section of the profile with thin-set mortar.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.
3. Press the profile into the mortar and abut to the adjacent floor covering. The profile should not be higher than the adjacent floor covering, but rather up to approx. 1/32" (1 mm) lower.
4. Fill the joint completely with grout or setting material.
5. Work with materials and tools that will not scratch or damage sensitive surfaces. Setting materials must be removed immediately.

RENO-T

1. Select the profile according to joint width, to ensure proper support of the lateral crosspiece.
2. The joint cavity must be at least 3/8" (9 mm) deep and free of debris. Substances that inhibit adhesion must be removed from the sides of the joint.

- Fill the joint with elastomeric sealant such as Schluter®-KERDI-FIX or similar. Then insert the vertical leg of RENO-T in the joint so that the lateral crosspiece rests completely on the edges of the surface coverings.
- Remove any excess sealant with a suitable cleaner.

Maintenance

Schluter edge-protection and transition profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles periodically using neutral cleaning agents.

Stainless steel surfaces exposed to the environment or aggressive substances should be cleaned periodically using a mild household cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydrochloric acid, hydrofluoric acid, and

chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

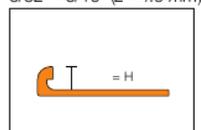

Oxidation films on exposed **solid brass** or **aluminum** can be removed by using a conventional polishing agent, but will form again.

In the case of **anodized aluminum**, **color-coated aluminum**, and **chrome-plated solid brass**, do not use abrasive cleaning agents.

Schluter® Systems Floor Profiles 5-Year Limited Warranty

LIMITED WARRANTY COVERAGE: Subject to the conditions and limitations as stated in this **Schluter® Systems Floor Profiles 5-Year Limited Warranty** (the "**Limited Warranty**"), Schluter Systems warrants that its Schluter®-SCHIENE, Schluter®-JOLLY, Schluter®-RENO-TK, Schluter®-DECO, Schluter®-RENO-U, Schluter®-RENO-T, Schluter®-RENO-RAMP, Schluter®-RENO-RAMP-K, and Schluter®-RENO-V (collectively, the "**Products**") will be free from manufacturing defects and will perform as described in the Schluter Systems Floor Profiles Technical Data Sheet (collectively, the "**Written Materials**") for a period of five (5) years from the date of purchase when installed and used in accordance with the terms and conditions of the Written Materials and industry standard guidelines that are not in conflict with the Written Materials in effect at the time of installation.

For the purposes of this Limited Warranty, "**Owner**" is defined as the original end user of the property in which the Products are installed; and "**Tile Assembly**" is defined to include the Products, non-reusable flooring surfaces, and applicable setting and grouting materials.

This Limited Warranty is only applicable to installations in the United States of America and Canada. Schluter Systems is not responsible or liable under any circumstances for determining the suitability of the Products for the Owner's intended purpose. It is the responsibility of the Owner to consult with an experienced and professional installer to ensure the suitability of the Products, subfloor/substrate and all building materials in the installation and that the Written Materials are followed properly.

RESOLUTION: If the Products are installed and used in accordance with the terms and conditions as described hereinabove and such Products are proven defective within the applicable warranty term, the Owner's exclusive remedy and the sole obligation of Schluter Systems, at its election, shall be to (a) reinstall or replace the failed portion of the Tile Assembly or (b) pay an amount not to exceed the original square foot cost of the installation of the Tile Assembly verified to be defective. Due to conditions beyond the control of Schluter Systems (e.g., color and shade availability, discontinuation, normal wear and tear), Schluter Systems cannot guarantee or warrant an exact match to the specific tile, stone, or other flooring materials used in the original installation. In such event, substantially similar materials may be substituted.

EXCLUSIONS FROM COVERAGE: This Limited Warranty excludes and in no event shall Schluter Systems have any liability for any indirect, special, incidental, punitive, exemplary, or consequential damages, including lost profits, arising out of or otherwise connected to the failure of the Products or Tile Assembly, regardless of any strict liability or active or passive negligence of Schluter Systems, and regardless of legal theory, whether in contract, tort, extra-contractual or other. This Limited Warranty further excludes any loss or damage arising out of or otherwise connected to: acts of war, terrorism, fire, explosion, natural disaster, acts of God, any failure to comply with the Written Materials, inadequate subfloor/substrate, improper preparation or other failure of subfloor/substrate, faulty or negligent penetration of the Products or subfloor/substrate, intentional acts of destruction, structural failure, misuse of or failure to maintain the Products, normal wear and tear, scratches, dents, corrosion or discoloration (whether caused by excessive heat, chemical cleaning products, abrasive agents or otherwise), efflorescence and shading which are a natural occurrence with cementitious materials and are not considered a defective condition for the purposes of this Limited Warranty, variations of texture, color or shade from those on product samples, packaging materials or other marketing materials, or other causes unrelated to the Products (e.g. floor covering failure, excess point loading, overvoltage). This Limited Warranty excludes exterior applications and applications utilizing glass tile or other non-approved floor coverings, unless specifically approved in writing on a case by case basis by the Schluter Systems Technical Services Director.

This Limited Warranty is conditioned and will be considered null and void and Schluter Systems will have the right to refuse any claims if: (a) the Products have been improperly stored or installed, or (b) the Products are subject to abusive or abnormal use, lack of maintenance, or used in a manner other than that for which the Products were designed or in any way contrary to the Written Materials.

DISCLAIMER: There are no warranties beyond this expressed warranty as stated herein. To the extent permitted by law, all other warranties, representations or conditions, expressed or implied, are hereby disclaimed and excluded, including but not limited to the implied warranties of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE** (as limited to such purposes as described in the Written Materials) or arising from a course of dealing, usage of trade or otherwise by law. ANY IMPLIED WARRANTIES ARISING BY OPERATION OF LAW ARE LIMITED IN DURATION TO THE TERM OF THIS LIMITED WARRANTY. NO REPRESENTATION, PROMISE, AFFIRMATION OR STATEMENT BY ANY EMPLOYEE OR AGENT OF SCHLUTER SYSTEMS WILL BE ENFORCEABLE AGAINST SCHLUTER SYSTEMS UNLESS IT IS SPECIFICALLY INCLUDED IN THIS LIMITED WARRANTY OR AUTHORIZED IN WRITING BY THE SCHLUTER SYSTEMS TECHNICAL SERVICES DIRECTOR. This Limited Warranty is given in lieu of any other warranty, whether expressed or implied. The remedies contained herein are the only remedies available for breach of this Limited Warranty. This Limited Warranty extends only to the Owner and is not transferable or assignable unless authorized by written agreement and signed by the Schluter Systems Technical Services Director or otherwise prohibited by specific state or provincial law. This Limited Warranty gives you specific legal rights; some states and provinces do not allow disclaimers or other restrictions of implied warranties; some of the above disclaimers may not apply to you. **No changes or modifications of any terms or conditions of this Limited Warranty are permitted unless duly authorized in writing by the Schluter Systems Technical Services Director.** This Limited Warranty shall supersede and replace any and all prior oral or written warranties, agreements, or other representations made by or on behalf of Schluter Systems relative to the Products or the application of the Products and shall apply to any installation occurring on or after April 8, 2019. If the Products are used in conjunction with other Schluter products, a different Schluter warranty may apply. For the most current information and materials regarding Schluter Systems warranties and programs, please visit https://www.schluter.com/schluter-us/en_US/downloadfiles.

MAKING A CLAIM: To make a claim under this Limited Warranty, the Owner must provide Schluter Systems² with written notice within thirty (30) days of any alleged defect in the Products covered by this Limited Warranty, together with date and proof of purchase of such Products and/or all of its components and name and address of all installers and all invoices related to the original installation, failing which this Limited Warranty shall have no legal effect³. Schluter Systems reserves the right at its election and as a condition of this Limited Warranty to inspect the alleged failed and/or defective Products.

All U.S. Claims shall be sent to:

Schluter Systems L.P.
Attn: Warranty Claims Dept.
194 Pleasant Ridge Road
Plattsburgh, NY 12901-5841

All Canadian Claims shall be sent to:

Schluter Systems (Canada), Inc.
Attn: Warranty Claims Dept.
21100 chemin Ste-Marie
Ste-Anne-de-Bellevue, QC H9X 3Y8

¹ If there are any conflicting terms between any Written Materials, the most recently updated document shall be deemed to control.

² This Limited Warranty is limited to sales of the Products made in and intended for use in the United States and Canada. For the purposes of this Limited Warranty, Schluter Systems L.P. shall offer warranty coverage to Owners located in the United States, and Schluter Systems (Canada) Inc. shall offer warranty coverage to Owners located in Canada.

³ In the event that Owner fails to provide such required invoices relating to the original installation, Schluter Systems shall pay Owner an amount equal to the average, reasonable costs of a comparable installation. If the parties fail to agree on such amount, such dispute shall promptly, and in the first instance, be submitted: (a) if a U.S. claim, to arbitration in Clinton County, New York, in accordance with the rules of the American Arbitration Association, or (b) if a Canadian claim, in the Province of Quebec, Canada, in accordance with the ADRIIC Arbitration Rules. Any outcome of such arbitration proceeding shall be final and binding upon the parties hereto.

Schluter Systems L.P. • 194 Pleasant Ridge Road, Plattsburgh, NY 12901-5841 • Tel.: 800-472-4588 • Fax: 800-477-9783
